PYRENEES RESISTANCE HIKE

~ From 18 to 25 Octobre ~

⛰️We are gathering as young people to hike across Occitania and Catalonia and talk about resistance !

🔥These lands have always been grounds for resistance : from the Cathars to the "Guerre des Demoiselles" and women defying state centralization; from the social revolution of 1936 and the internationalist Maquis resistance groups during WWII to today's struggles against mining and in defense of local cultures.

To address the current challenges facing our societies, and to defend Occitan, Catalan culture and those of all other peoples living in this region we want to bring these histories to life.

⚡We live within this legacy today, and we want to harness it as a force to build fairer societies. We want to honor, draw inspiration from, and carry on these traditions of resistance. We want to reflect on our lives in the mountains🌿

So, for one week, we will hike from Montségur in Occitania to Sort in Catalonia, sharing various workshops along the way, come join us!

As the organisation team, we're getting inspire by the Kurdistan liberation movement experiences and ideas.
